A scientific breakthrough! Hyaluron soft gel caps for your natural mobility

Researchers took decades to be now able to apply Hyaluron orally.

With over 230 joints a precautionary treatment by the use of syringes is impossible, therefore the additional oral use of Hyaluron is necessary.

- Hyaluronic acid oils and lubricates the over 230 joints in the human body and keeps them smooth and flexible.
- It builds important cartilage mass and in this way reduces the probability of movement pain.
- Dry and brittle joint cartilages, a decreasing cushion between the spinal column and the joints, as well as general degeneration can be affected positively.
- Connective tissue - mucous membranes - vocal cords
- Brain, which particularly needs a lot of water.
- Skin - face - hands - fingers - arms - legs
- Cardiac valves, which close better with Hyaluron
- Eyes, which consist of 98% water, held together by only a minimum part of hyaluronic acid.
- Wandering cells: hyaluronic acid supports the migration of the cells by an extension of the cell gaps.
- Ears, where in the auditory canals water plays a crucial role.
- The cartilage mass in over 230 joints:
 Knee joints - wrists - hip joints - shoulder joints - spinal column - intervertebral disks..etc.

The 60 capsules per box last for a one month period. (2x per day 1 cap taken with plenty of water)

At the beginning, however, it is recommended to double the dose, to positively affect the already developed problems.

Hyaluron is a natural food additive, which is suitable for permanent use.

Retail price 36.80 € Website: www.geraeteliste.de

Order:

Qty.	Description of article:	Total
	ArtNo. 7000 Hyaluron – Capsules 60 pcs per container, for oral usage 7,2 mg Hyaluronic Acid (80 % mg Injuv® Hyaluronic Acid-Complex), 50 mg Curcuma-Powder, 50 mg Ginger Oil, 7,6 mg Zinc	€
